

Commissioners
Linda Oosterman – District 1
Russell E. Olsen – District 2
Chris Stearns – District 3

Providing safe, reliable, affordable, and sustainable service.

DETERMINATION OF NON-SIGNIFICANCE

- **Description of proposal:** The Sward #1 – 278 and Platt 2 - 511 Group B systems will be consolidated into a single Group A system due to the failure of the Platt well. The Platt well will be decommissioned and the Sward Well will be the source for the consolidated system. A new dedicated fill line will be installed from the Sward well to the proposed tank at the Platt site and will permanently connect the adjoining systems. The proposed 10,000-gallon tank will replace the existing tanks at the Platt and Sward sites to provide storage for the entire system. The existing building at the Platt site will be enlarged approximately 72 square feet to provide space for the larger tank.
- **Proponent:** Thurston PUD
- **Location of proposal, including street address, if any:**
 - Sward Pumphouse
 - Address: 100 Draws Lane, Winlock, WA 98596
 - Parcel: 015006004012
 - Abbreviated Legal Description: Section 08 Township 12N Range 02W PT SE SE LT 3-4 SP 96-83 3006216
 - Platt Pumphouse
 - Address: 135 Quarry Ln, Winlock, WA 98596
 - Parcel: 015006004013
 - Abbreviated Legal Description: Section 08 Township 12N Range 02W PT E2 SE4 LT 1 QUARY LANE 3143059
- **Lead agency:** Thurston PUD

The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21C.030 (2)(c). This decision was made after review of a completed environmental checklist and other information on file with the lead agency. This information is available to the public on request.

- There is no comment period for this DNS.
- This DNS is issued after using the optional DNS process in WAC 197-11-355. There is no further comment period on the DNS.
- This DNS is issued under WAC 197-11-340(2); the lead agency will not act on this proposal for 30 days from the date below. Comments must be submitted by 2/22/2021.**

- Responsible official: **John Weidenfeller**
- Position/title: **General Manager**
- Phone: **360-357-8783**
- Address: **1230 Ruddell Rd SE, Lacey, WA 98503**

Signature: 

Date: 1/21/2021

SEPA ENVIRONMENTAL CHECKLIST

A. Background [\[HELP\]](#)

1. Name of proposed project, if applicable:
Thurston PUD Consolidation of Sward – 278 (06046H) and Platt 2 – 251 (08272L) into one water system.
2. Name of applicant:
Thurston PUD.
3. Address and phone number of applicant and contact person:
**Kim Gubbe, Director of Planning and Compliance
1230 Ruddell Rd SE
Lacey, WA 98503
360-357-8783**
4. Date checklist prepared:
9/23/20 – 01/12/21
5. Agency requesting checklist:
Thurston PUD and the Washington State Department of Health.
6. Proposed timing or schedule (including phasing, if applicable):
 - **Construction expected to begin approximately Summer of 2021.**
 - **Construction expected to be completed approximately Fall of 2021.**
 - **Work hours will be Monday – Friday, 8:00a – 4:30p.**
7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.
No, there are no current plans for future additions, expansion, or further activity related to this proposal.
8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.
Cultural Review - A constultant will conduct and provide a report that includes an Inadvertant Discovery Plan (IDP).

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.
No, the PUD is not aware of other proposals that directly affect the property covered under this proposal.
10. List any government approvals or permits that will be needed for your proposal, if known.
Since the project is funded by a DWSRF loan, the Washington State Department of Health is involved in the approval process. However, it appears that no project specific approvals or permits are required.
11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)
The Sward #1 – 278 and Platt 2 - 511 Group B systems will be consolidated into a single Group A system due to the failure of the Platt well. The Platt well will be decommissioned and the Sward Well will be the source for the consolidated system. A new dedicated fill line will be installed from the Sward well to the proposed tank at the Platt site. This approximately 518 feet of 2” pipe will permanently connect the adjoining systems. The proposed 10,000 gallon tank will replace the existing tanks at the Platt and Sward sites to provide storage for the entire system. The existing building at the Platt site will be enlarged approximately 72 square feet to provide space for the the larger tank.
12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.
- **Sward Pumphouse**
 - **Address: 100 Draws Lane, Winlock, WA 98596**
 - **Parcel: 015006004012**
 - **Abbreviated Legal Description: Section 08 Township 12N Range 02W PT SE SE LT 3-4 SP 96-83 3006216**
 - **Platt Pumphouse**
 - **Address: 135 Quarry Ln, Winlock, WA 98596**
 - **Parcel: 015006004013**
 - **Abbreviated Legal Description: Section 08 Township 12N Range 02W PT E2 SE4 LT 1 QUARY LANE 3143059**
 - **See Site Plans for details.**

B. Environmental Elements [\[HELP\]](#)

1. EARTH

- a. General description of the site:
(circle one): Flat, rolling, hilly, steep slopes, mountainous, other _____
Flat.
- b. What is the steepest slope on the site (approximate percent slope)?
Approximately 4%.
- c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.
Salkum Silty Clay Loam.
- d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.
None known, and may vary throughout the water system.
- e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.
- **Purpose of excavation: To install 518 feet of 2" water main.**
 - **Total volume of excavation to install water main: 518 feet of main * 3.5 feet trench depth * 2.5 feet trench width = approximately 4532.5 cubic feet of excavation.**
 - **Type of fill: Local soil or other non-impervious material will be used to back fill.**
 - **Total volume of fill around water main: 4532.5 cubic feet – (3.14 * .0833 feet radius of pipe * 518 ft length of pipe) = approximately 4521.2 cubic feet of fill.**
 - **Purpose of grading: To level the excavated area.**
 - **Total area of expected grading = 518 ft * 2.5 feet = 1295 square feet**
- f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.
Construction will likely produce dust, however the project site is not within an Erosion Hazard Area per Lewis County GIS data.
- g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?
Existing impervious area covers approximately 6% of the project site and proposed impervious area will cover approximately 11% of the project site.

- h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:
An Erosion Control Best Management Practices will be followed by the contractor including watering dry soil before ground disturbing activities and vegetation management such as grass seeding.

2. AIR

- a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.
Possible air emissions or odors include dust, automobile emissions, construction equipment, and concrete batching. The quantity of emissions is unknown. The duration of dust, vehicle, and equipment emissions will be limited to Monday – Friday, 8a – 4:30p for the length of the project. The duration of concrete batching will be approximately one week.
- b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.
No, there are no off-site sources of emissions or odor that may affect the proposal.
- c. Proposed measures to reduce or control emissions or other impacts to air, if any:
Watering prior to ground disturbing activities will help limit the impact of dust and debris being discharged into the air.

3. WATER

- a. Surface Water: [\[help\]](#)
 - 1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.
Yes, there is a wetland approximately 200 feet west of the Platt pumphouse and an unnamed stream in the same area, located over 200 feet from the Platt pumphouse and Sward well. There are no fish in the stream per Lewis County Stream Buffer GIS data and the Department of Fish and Wildlife. See Attached map. The proposed construction activities are over 200 feet from the unnamed stream and outside the associated buffer. The project site is not within any critical area buffers per the Lewis County GIS maps.

- 2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans. If the project involves impacts to aquatics lands, you may need a hydraulic project approval (HPA) from the state Department of Fish and Wildlife, shoreline permits from the local government and possibly a use authorization from the Department of Natural Resources.

Yes, the wetland described above is within 200 feet of the Platt pumphouse addition, the Platt well decommission, and the noted unnamed stream is just over 200 feet from the same and from the Sward well upgrade, and a small section of water main installation at both pump houses. The project site is not within any critical area buffers per the Lewis County GIS maps. The water bodies are approximately 6 – 12 feet lower in elevation than the project site. A Stormwater Protection Plan will be created to mitigate any potential runoff to the wetlands and stream.

- 3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

Does not apply. No fill or dredge material will be placed in or removed from surface water or wetlands.

- 4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

No. The proposal does not require surface water withdrawals or diversions.

- 5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

No. The proposal does not lie within a 100-year floodplain.

- 6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.

No. The proposal does not involve any discharges of waste materials to surface waters.

b. Ground Water: [\[help\]](#)

- 1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

Yes, the Sward well will remain operational and continue to provide water service to the customers of the newly formed water system. The well details are as follows: Sward S01, Well ID - AKK666, 30 gpm.

Other than as described above, no additional groundwater will be withdrawn from a well and no water will be discharged to groundwater.

- 2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.).

Does not apply. No waste material will be discharged into the ground.

c. Water runoff (including stormwater):

- 1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

No new source of runoff will be included in this project. Currently whatever storm water that does not infiltrate the ground disperses to the east of the site of the property due to natural slope of the land.

- 2) Could waste materials enter ground or surface waters? If so, generally describe.

No waste material will be discharged to ground or surface waters.

- 3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

No, the proposal does not alter or otherwise affect drainage patterns in the vicinity of the site.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

No, the proposal does not alter or otherwise affect drainage patterns in the vicinity of the site.

4. PLANTS

- a. Check the types of vegetation found on the site:
___deciduous tree: alder, maple, aspen, other
___evergreen tree: fir, cedar, pine, other
__X__shrubs
__X__grass
__X__pasture
___crop or grain
___ Orchards, vineyards or other permanent crops.
___ wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
___water plants: water lily, eelgrass, milfoil, other
___other types of vegetation
- b. What kind and amount of vegetation will be removed or altered?
Grass will be removed to expand the pumphouse and install parts of the water main. When the work is completed, new grass will be planted.
- **518 feet of water main * 2.5 ft wide trench = 2590 square feet.**
 - **8 feet * 9 feet pumphouse extension = 72 sqare feet**
 - **Approximately 2662 square feet of vegetation will be removed.**
- c. List threatened and endangered species known to be on or near the site.
- **Kincaid's Lupine – threatened.**
 - **Nelson's Checker-Mallow – threatened.**
- d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:
Grass will be replanted where it was excavated.
- e. List all noxious weeds and invasive species known to be on or near the site.
There are no known noxious weeds or invasive species on or near the site.

5. ANIMALS

- a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site.
The Roosevelt Elk and Northern Spotted Owl.
- b. List any threatened and endangered species known to be on or near the site.
The Northern Spotted Owl is endangered.
- c. Is the site part of a migration route? If so, explain.
Yes, the site is part of the Pacific Flyway.

- d. Proposed measures to preserve or enhance wildlife, if any:
Habitat restoration that includes re-planting grass, maintaining water quality and hydrology.
- e. List any invasive animal species known to be on or near the site.
There are no known invasive animal species near the site.

6. ENERGY AND NATURAL RESOURCES

- a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.
There are no direct energy needs to power the storage tank or the water main when the project is completed. Indirectly, the pump requires electricity to withdraw water from the aquifer and distribute it to the reservoir, pipes, and customers.
- b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.
No, the project won't affect the potential use of solar energy by adjacent properties.
- c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:
A variable frequency drive will be installed to improve energy efficiency of the pump/motor.

7. ENVIRONMENTAL HEALTH

- a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe.
Since the project site is within a Wellhead Protection Area, all trucks, construction equipment, and gas powered tools will be checked for possible leaks. Although not likely, leaking brake fluid, engine oil, gasoline and other fluids that help the vehicles and equipment run pose a hazard if they were to seep into the ground. Routine checks should be sufficient to eliminate any exposure.
 - 1) Describe any known or possible contamination at the site from present or past uses.
There is no known contamination at the site.

- 2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.
Per the National Pipeline Mapping System there are no hazardous liquid or gas transmission pipelines located within 660 feet of the project site.
- 3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.
There are no known toxic or hazardous chemicals associated with the project.
- 4) Describe special emergency services that might be required.
 - **In the event of a fire, call the fire department or attempt to extinguish the fire.**
 - **In the event of a spill, contain the flow as possible, clean up the waste and any contaminated materials as soon as practicable, and call 1-800-SPILL-911.**
 - **If a fire, explosion or other release could threaten human health or could reach state waters, call 1-800-SPILL-911 and the National Response Center at 1-800-424-8802.**
- 5) Proposed measures to reduce or control environmental health hazards, if any:
Specific measures are included with each question above.

b. Noise

- 1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?
Outside noises will have no impact on the project.
- 2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.
Equipment and tool noise is to be expected during excavation and construction. Work will take place Monday – Friday, 8:00a – 4:30p.
- 3) Proposed measures to reduce or control noise impacts, if any:
For people and animals in the area, limiting operational hours to Monday – Friday, 8:00a – 4:30p will help control noise impacts. For construction workers, wearing appropriate Personal Protection Equipment such as ear plugs will reduce the noise level.

8. LAND AND SHORELINE USE

- a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.
The site is part of the water system infrastructure including a reservoir and pumphouses. The site is adjacent to single family housing.
- b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?
No, the site has not been used as working farmlands or working forest lands. No agricultural or forest land will be converted to other uses for this project.
- 1) Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:
No, the proposal will not affect or be affected by surrounding working farms or forest land operations.
- c. Describe any structures on the site.
There are two pumphouses, both approximately 150 square feet.
- d. Will any structures be demolished? If so, what?
No, no structures will be demolished.
- e. What is the current zoning classification of the site?
Rural Lands RDD-10. There are no proposed changes to the zoning designation.
- f. What is the current comprehensive plan designation of the site?
Rural (Other Rural Land – Non Resource).
- g. If applicable, what is the current shoreline master program designation of the site?
Does not apply, not in or near a shoreline designation area.
- h. Has any part of the site been classified as a critical area by the city or county? If so, specify.
The project site is not within any critical area buffers per the Lewis County GIS maps.
- i. Approximately how many people would reside or work in the completed project?
None. Field staff will visit the site for routine operations and maintenance.
- j. Approximately how many people would the completed project displace?
No one will be displaced by the completed project.

- k. Proposed measures to avoid or reduce displacement impacts, if any:
Not applicable because no one will be displaced.

- l. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:
The proposal complies with existing and projected land use because we are upgrading the current structures, not building new ones that may have a different designation. The installation of additional water main for the residential water systems being consolidated reinforces the current residential designation.

- m. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:
Not applicable because no agricultural and forest land of long-term commercial significance will be impacted by the project.

9. HOUSING

- a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.
Not applicable. No housing units will be provided as part of this project.

- b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.
Not applicable. No housing units will be eliminated as part of this project.

- c. Proposed measures to reduce or control housing impacts, if any:
Not applicable. No housing impacts are anticipated as part of this project.

10. AESTHETICS

- a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?
The Platt pumphouse will be approximately 18 feet in height with a wood exterior and composite or shingle roof.

- b. What views in the immediate vicinity would be altered or obstructed?
No views in the immediate vicinity will be altered or obstructed.

- c. Proposed measures to reduce or control aesthetic impacts, if any:
None. There are no aesthetic impacts to reduce or control.

11. LIGHT AND GLARE

- a. What type of light or glare will the proposal produce? What time of day would it mainly occur?
Light and glare from work trucks and equipment is possible. It would mainly occur on sunny days, Monday – Friday, 8:00a – 4:30p.
- b. Could light or glare from the finished project be a safety hazard or interfere with views?
No light or glare will pose a safety hazard as part of the project. The pumphouse does not have any windows or other reflective material. Underground water main is not exposed to light.
- c. What existing off-site sources of light or glare may affect your proposal?
Headlights from passing vehicles could be distracting to the construction crew, but the project site is a rural, low-traffic area and most work will take place during hours with sunlight.
- d. Proposed measures to reduce or control light and glare impacts, if any:
None.

12. RECREATION

- a. What designated and informal recreational opportunities are in the immediate vicinity?
There are no recreational opportunities in the immediate vicinity.
- b. Would the proposed project displace any existing recreational uses? If so, describe.
No, the project would not displace any existing recreational uses.
- c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:
Not applicable because there are no anticipated impacts on recreation.

13. HISTORIC AND CULTURAL PRESERVATION

- a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.
No, there are no buildings, structures, or sites that are eligible for listing on preservation registers.

- b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.
A professional cultural review will be conducted. Per WISSARD's Predictive Model there is a moderate to high risk.
- c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.
Methods include a professional cultural review as well as GIS data from DAHP's WISAARD map. In addition, copies of this SEPA will be provided to interested tribes identified in the previous question during the public comment period.
- d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.
In the event that archaeological materials are encountered during the project, an archaeologist will immediately be notified, and work halted in the vicinity of the find until the materials can be inspected and assessed. At that time, the appropriate persons are to be notified of the exact nature and extent of the resource so that measures can be taken to secure them. In the event of inadvertently discovered human remains or indeterminate bones, pursuant to RCW 68.50.645, all work must stop immediately, and law enforcement should be contacted. Any remains should be covered and secured against further disturbance, and communication established with local police, the DAHP, and any concerned tribal agencies.

14. TRANSPORTATION

- a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.
Draws Ln and Quarry Ln provide direct access to the site. Highway 603 is more than half a mile from Quarry Ln.
- b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?
No, there is no public transit serving the site.
- c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate?
Does not apply. No parking will be developed or eliminated as part of this project.

- d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).
No, the proposal does not require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities.
- e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.
No, the proposal will not use (or occur in the immediate vicinity of) water, rail, or air transportation.
- f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?
Less than 1 per day. Field staff will perform routine checks and maintenance as needed, typically on a weekly or monthly basis.
- g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.
No, the proposal will not interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area.
- h. Proposed measures to reduce or control transportation impacts, if any:
Does not apply. No impacts are anticipated.

15. PUBLIC SERVICES

- a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.
No, the project will not result in an increased need for public services such as emergency services, school enrollment, police and law enforcement, or public transit.
- b. Proposed measures to reduce or control direct impacts on public services, if any.
Does not apply. No impacts are anticipated.

16. UTILITIES

- a. Circle utilities currently available at the site:
electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system,
other _____
Electricity and water.
- b. Describe the utilities that are proposed for the project, the utility providing the
service, and the general construction activities on the site or in the immediate vicinity
which might be needed.
**There are no new utilities proposed for this project. Thurston PUD is upgrading and
expanding the current water infrastructure to consolidate the previously mentioned
water systems into one system. Electricity is provided by Puget Sound Energy (PSE).**

C. Signature [\[HELP\]](#)

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature: *Brian Wilson*

Name of signee: **Brian Wilson**
